

Access and Run Reports, Analyses and Dashboards

User Guide

One Council. One System.

Simpler, quicker, and better Finance, HR and Purchasing systems that help us make betterinformed decisions and deliver excellent outcomes for residents.

INTRODUCTION

This document forms part of the wider selection of SMBC's Oracle Fusion training and documentation suite.

THIS DOCUMENT IS INTENDED TO BE USED BY:

• Users who need to run reports

SCOPE OF THIS DOCUMENT:

- The purpose of this document is to provide guidance for users when performing enduser tasks on the Oracle Fusion system.
- This document is intended to act as a guide for detailing the steps involved in a variety of everyday on-system processes
- This document contains some off-system process information, but for in-depth process information, users are advised to refer to either company policy and regulations documentation, or the relevant professional team

OUT OF SCOPE:

- This document does not advise users on specific options to be selected for every possible eventuality
- This document does not advise regarding system administration activities

1 | REPORTS & ANALYSES IN ORACLE FUSION

1.1 | Overview

OTBI stands for Oracle Transactional Business Intelligence. In **OTBI Reporting and Analytics**, you can create and run business intelligence analyses, dashboards, and reports to gain insights that you can then act on and use to meet specific business requirements.

In Oracle Fusion, you can access and use different types of predefined or custom analytics, dashboards, reports, and Infolets.

Analyses rather than **Reports** are the focus of this guide, and the associated training. The table below explains the differences between the two terms in an Oracle Fusion context, as well as how a collection of **Analyses** may be presented in a **Dashboard**.

i

OTBI runs on a separate database and is dependent on scheduled synchronisation processes to run. Depending on how frequently (or infrequently) those processes are set to run, some data may be slightly out of date. This is especially the case if some processes are set to run overnight, and therefore the full up-to-date information is not available until the following morning.

Object	What It Displays	What It Is Typically Used For
Analysis	Data in an interactive format, often displayed in a table or graph.	Summarise or break down simple, real-time data, which helps you in taking short-term decisions. e.g. A listing of invoices, broken down by Supplier, sorted by invoice amount in descending order, and with higher-value items highlighted.
Report	Data in a predefined format that provides little or no interaction.	Get high-volume data in a high-fidelity output optimised for printing, for example in documents to support internal operations, statutory requirements, and other business needs. e.g. A General Ledger Transactions Report or Payroll Paymaster's Report.
Dashboard	A collection of analyses/content, presented on one or more pages/tabs.	Get various pieces of information about a particular subject. e.g. A line manager dashboard for viewing a whole host of data relating to team member activity.

Infolet	A self-contained,	Infolets are interactive and typically display high-level,
	interactive 'box'	aggregated, essential information for quick consumption at a
	used to display	glance, and then can be acted upon as needed.
	information using text and charts.	eg. A single info box that contains specific time-delineated information on invoice processing, showing invoices that are <7 days / 7-14 days, and >14 days since receipt) displayed on a dashboard along with a selection of other Infolets, each with their own specific at-a-glance purpose.

2 | ACCESSING/VIEWING REPORTS, ANALYSES & DASHBOARDS

2.1 | Overview

i

i

This chapter details how to access and run existing reports in Oracle Fusion.

There are a combination of the following available via the Reports and Analytics screen:

- Seeded reports standard reports available in Oracle Fusion
- Custom reports customised reports created specifically for SMBC/SCT

Both seeded reports and custom reports are found in the **Shared Folders**, but only **Custom** reports are found in the **Custom** folder.

2.2 | Access the 'Reports and Analytics' screen

Follow the navigation steps below:

Log in to **Oracle Fusion** using your credentials.

From the **Home** screen, select the **Tools** module.

Select the **Reports and Analytics** tile.

e oracle					Ĺ	ンタロ	Ĉ13
0.00	Good after	noon, Trao	cy Nevin				
	Me My Team	My Client Groups	Sales Hel	p Desk Procuren	nent Tools	2	
	APPS						
					+		
	Set Preferences	Approvals	Reports and Analytics	Scheduled Processes			

Alternatively, you may access the **Reports and Analytics** screen via the **Navigator**: Select the **Navigator** icon.

The Reports & Analytics screen displays (see below).

E ORACLE 4 Reports and Analytics ⑦		☆	9	ری Browse Ca	TN atalog
Filter All types Search 7 Clear F	ilters				
8	No results found. Search for analysis, report, or dashboard. Click the star icon to favorite an object.				

Number	Item	Description
4	Reports and	The screen header
	Analytics screen	
5	Folder Selector	View either My Folders or Shared Folders
6	Filter	May be used to show either Dashboards, Reports or Analyses
		or the default: All Types
7	Search	Used to search for a specific report, dashboard or analysis
8	Create	Used to create a new analysis or report
9	Browse Catalog	Used to access the BI Server, where you can see the catalog of
		available pre-prepared reports, analyses, and dashboards.

2.3 | View Reports via the 'Reports & Analytics' screen

To access a specific report, dashboard, or analysis, follow the navigational instructions below:

From the **Reports and Analytics** screen, select **All Folders**.

The My Folders and Shared Folders options display below.

Reports and Analytics ⑦				
All Folders >>				
Filter All types				
Create V				
My Folders				
Shared Folders				

i

My Folders – contains analyses and dashboards created by you. Only specific nominated users have access to use this folder for creation of new analyses, dashboards, and reports. If you do not have access to it, then it can be ignored.

Shared Folders – its subdirectories contain seeded analyses, reports, and dashboards, and the Custom directory is found there too.

All users have access to the Shared Folders for viewing reports relevant to their role profile. E.g., Procurement team members will be able to see relevant reports to their area. Payables team members will see a different set of reports relevant to them, etc.

Select the relevant folder to see reports, dashboards or analyses (as well as additional subfolders) specific to that area.

Reports and Analytics ⑦
All Folders » 🛅 Shared Folders
Filter All types Favorites Clear Filters
Create 🔻
Common Content
Custom
Enterprise Contracts
Financials
Higher Education
Human Capital Management

Some folders have further subfolders, which you can select until you reach the lowest level containing the actual reports, analyses, and dashboards.

In the example overleaf, note the path used to navigate to the **Payables Invoice Aging Report**, as displayed at the top of the screen:

Reports and Analytics ⑦
All Folders » Shared Folders » Financials » Payables » Invoices
Filter All types Favorites
Create V
Payables Credit Memo Matching Report
A Payables Invoice Aging Report
Payables Invoice Audit by Voucher Number Listing
Payables Invoice Audit Listing
Payables Invoice Register
Payables Invoice Register

In the above example, there are two reports available in the *Invoices* subdirectory. There are also folders at this level, which may contain either reports or additional subfolders in which reports can be found.

Note that the same navigation principle applies to each of the folders, whether for Financials, Human Capital Management, Procurement or others.

2.3.1 | Open a Report; Select Parameters; Run the Report

The same process below applies to both seeded and custom reports.

Select the required report from the relevant folder or subfolder.

In the example below, the **Leavers Report** is accessed.

Reports and Ana	lytics ⑦			Browse Catalog
🛅 All Folders » 🛅 S	Shared Folders » 🛅 Custom » 🛅 Human Capital Management » 🛅 HR » 🛅 Reports

The report opens in another browser window or tab.

💣 Leavers Report			Home Catalog Favorites v	Dashboards -	Create		- 9
* Date From	Date To	Assignment Category All	Legal Employer All		•	Apply	
Output				9 ⊞	x •	\$)

Depending on the specific report or analysis selected, you may have options to select before the report runs.

For example:

- Enter a date range where applicable.
 - In the example above, this is a mandatory requirement, as indicated by the asterisks next to the **Date From** and **Date To** fields).

Leavers Re	port			
* Date From	01-01-2024	Ëc	* Date To	05-08-2024

- Select options from any dropdown menus provided.
 - In the example above, the Assignment Category defaults as 'All', but can be changed by the selecting from the dropdown. Likewise with 'Legal Employer'.

Once selections have been made, select **Apply** to run the report or analysis.

^	Leavers Re	port					Hom	ne Catalog	Favorites -	Dashboar	ds 🔻	Create	→ C)pen 🔻

The report results can then be optionally exported to Excel/PDF or another format using the toolbar.

In the case of reports that are designed to automatically download, a **Report Completed** message displays, and the file downloads to your device.

Open the file from your device to view the report based on the parameters set.

Note that data access is set up to control which users can see which data.

For example, if you are SMBC employee, you may only be permitted to see SMBC data, and not SCT data.

The data you see when you run a report will already have these restrictions applied.

i

2.4 | View Reports via the Reports Catalog

In addition to being able to view reports via the Reports and Analytics screen, you can alternatively view reports via the **Reports Catalog**.

To access the **Reports Catalog** from the **Reports and Analytics** screen, select the **Browse Catalog** button in the upper right corner of the screen.

The **Reports Catalog** opens in a new browser window or tab.

Important: These reports are no different to those viewable via the **Reports and Analytics** screen, but additional options are available via this screen.

In the Folders section on the left, select Shared Folders.

Expand the relevant folders to see reports, dashboards, or analyses (as well as additional subfolders) specific to that area.

Some folders have multiple subfolders, which you can select until you reach the lowest level containing the actual reports, analyses, and dashboards.

In the example below, note the path used to navigate to the **Leavers Report**, as displayed in the navigation bar at the top of the screen:

Another example report from Finance is the **Payables Invoice Register** report.

Note that the same navigation principle applies to each of the folders, whether for Financials, Human Capital Management, Procurement or others.

Different types of reports may be available via these folders, including BI Publisher Reports and OTBI Reports.

2.4.1 | Open a BI Publisher Report; Select Parameters; Run the Report

i

The same process below applies to both seeded and custom reports.

1. From the **Catalog** screen, select the **Open** option for the required report from the relevant folder or subfolder.

For example, if you are SMBC employee, you may only be permitted to see SMBC data, and not SCT data.

The data you see when you run a report will already have these restrictions applied.

2.4.2 | Open an OTBI Analysis; Select Parameters; Run the Analysis

1

The same process below applies to both seeded and custom reports.

From the **Catalog** screen, elect the **Open** option for the required OTBI Analysis from the relevant folder or subfolder. The example below is a Talent Registrations Analysis.

The report screen opens, with the parameters shown at the top.

Talent - Registration	ns Analysis				Home	Catalog	Favorites 🗸	Dashboards 🗸	Create 🗸	Open 👻	0
* Business Unit Division Directorate Assignment Category	Select Value										
* Registration Expiry Date	Between	tie -	ок	Co Reset ▼							

The above report is an example of a report created via OTBI. From an end-user perspective, there is very little difference between a BI Publisher report and an OTBI Analysis.

There may be dropdown lists to choose from, dates or date ranges to select, mandatory (*) and non-mandatory fields etc.

In this example, the **Business Unit**, **Type of Registration**, and **Registration Expiry Date Range** are the mandatory fields.

1

Once selections have been made or adjusted, select **OK** to run or re-run the report or analysis.

* Business Unit :	Sandwell Metropo 🔻		
Division -	-Select Value 🔻		
Directorate	-Select Value V		
Assignment Category	Select Value 🔻		
* Type of Registration	HCPC (Health anc √		
* Registration Expiry Date	Between 12/01/2024	12/31/2024	Ē

In the case of reports that are designed to run and display output in the Oracle Fusion browser window, you will see the results display below after a few moments.

alent - Peristra	ations Analysis						
ulent - Registre	alions Analysis						
Licenses and Certifications	Type of Registration	Assignment Number	Registration Number	Registration Expiry Date	Email Address	Supervisor Full Name	Date Chased
	HCPC (Health and Care Professions Council)	E10114-3	112233	12/10/2024	sendmail-test- discard@oracle.com		1/11/2024
	HCPC (Health and Care Professions Council)	E35188-3	XYZ22345	12/1/2024	sendmail-test- discard@oracle.com		11/15/2023
	HCPC (Health and Care Professions	E94268	XYZZ123QRT	12/15/2024	sendmail-test-		11/6/2023

2.5 | Other Reporting Options (e.g. Export, Print, Email)

It is always recommended to export **Formatted** results, rather than the raw **Data**.

- You can **Print** the output.
- You can Add to Briefing Book. This allows you to run the Briefing book and get either the latest (updateable) version of the analysis, or else a static snapshot of the analysis, without having to access the analysis itself.

You can then select an output option, e.g., PDF. It downloads to your device, where you can open and view the booklet.

Note that data access is set up to control which users can see which data.
 For example, if you are SMBC employee, you may only be permitted to see SMBC data, and not SCT data.
 The data you see when you run a report will already have these restrictions applied.

3 WORKING WITH DASHBOARDS IN ORACLE FUSION

3.1 | View a Seeded Dashboard via the Catalog

A dashboard is essentially a combination of various analyses and reports into one easily accessible screen, providing meaningful summary information, typically related to a specific topic or process (in this example, the Recruit to Hire process).

From the Catalog screen, select the Dashboards tab.

A dropdown menu displays.

i

Select a dashboard from the list.

In this example, the seeded **Recruit to Hire Dashboard** opens on the default **Overview** tab.

Recruit to Hire Dashboa	rd 🗸		Alertsi Home Catalog Favorites 🕶 Da

Number	Item	Description
1	Parameters (Filters)	The parameters listed here may be used to filter information that displays across the various tabs of the dashboard.
2	Dashboard View	Displays information from multiple reports or analyses, incorporating any filters you have applied, combined into one visual representation.
3	Tabs	Each tab typically represents a subdivision or stage of the process being analysed in the overall dashboard, often displayed in sequence.

View the dashboard information in the main dashboard viewing area.

Apply filters if required (e.g. filter by a specific year or years), and then check the updated results in the main dashboard viewing area.

If you see a message such as the following in the dashboard, then it may be because the filters applied are too restrictive. Alternatively, there may simply be no data for this specific element within the dashboard.

Scroll between tabs to view specific information related to the tab heading.

In addition to parameters (filters) on the left, some graphs/charts/widgets/tables have their own parameters to select from, for example 'View by' or 'Show View' as seen below.

Some dashboard components have drilldown options, that enable you to select a hyperlinked aggregated value, so as to 'drill down' into the individual records (i.e. access the detailed information that makes up that aggregated value).

In the example below, selecting the **# Open Requisitions (10)** drills down to the listing of those specific requisitions.
